## ON YOUR TURN, DO ONE ACTION:

### PRINT:

Play one card from your play area. Resolve any  $\neg$  effects. Then resolve any possible triggered  $\infty$  effects.

### MIX:

**Once\***: Return exactly 2\* cards from your hand\* to the  $\infty$  supply or  $\bullet\bullet\bullet$  /  $\bullet\bullet\bullet$  discard piles. Add a card with matching pigments from the market to your hand\*. \*Can be modified by  $\infty$  effects.

### REFILL:

Return any number [even zero] of cards from your play area to your hand. This makes it possible to play them again on later turns, enabling you to reuse powerful  $\neg$  effects. Can trigger  $\infty$  effects.

**SWAP:** Return 1 card from hand, to add 1  $\bullet\bullet$  to hand.

## ON YOUR TURN, DO ONE ACTION:
